

# TGD-F15

## LIGHTWEIGHT ALL-ROUNDER

NEW

### TESTED ACCORDING TO

- » EN ISO 13849
- » EN 60204-32
- » EN 62061
- » EN 62745

The TGD-F15 is ARCON's most compact pushbutton transmitter, which comes with radio/cable control as standard. The three-row arrangement makes it easy to operate all 15 single-step pushbuttons, even when wearing gloves. Each button has a status indicator (RGB) and additional backlighting. The optional cable control considerably increases the usability of the hand-held transmitter, as all the data is transmitted via control cable and the battery is charged at the same time. Stickers can be used to customise the labelling on the TGD-F15 to suit the individual requirements.

### TECHNICAL DATA

PROTECTION CLASS IP	IP 65
TEMPERATURE RANGE	-20 to +60 °C
WEIGHT	approx. 300 g
DIMENSIONS	80 x 45 x 175 mm (W/D/H)
FREQUENCY RANGE	863-930 MHz; 2.4 GHz
BATTERY TECHNOLOGY	integrated, Li-Ion
OPERATING TIME	up to 80 hours
OPERATING RANGE	> 100 m

### OPTIONS

- STOP Cat. 3 PLe / SIL3
- 15 single-step pushbuttons up to Cat. 1 PLc / SIL1
- Button illumination
- Status indicator pushbuttons (RGB)
- Toggle switch (momentary or latching) up to Cat. 2 Pld / SIL2
- Cable control with integrated charging function
- Multi-operation
- User-defined switch-off time
- Customised labelling
- Shoulder belt
- Wall mount
